

## **Version 2: 133 Words**

The Chicago Climate Action Plan is a comprehensive and detailed strategy to help lower greenhouse gas emissions and address climate change. It builds upon the many efforts the City and its partners have already undertaken to make Chicago the most environmentally friendly city in the nation.

Community groups, faith-based organizations, businesses, and chambers of commerce helped craft the plan; each has a role in its implementation. The City of Chicago is committed to fostering partnerships to carry out each recommended action. Working together, we can assure that Chicago will continue to be a place where families and businesses come to live, play and work.
